If your iPad runs iOS 5, adjust 2 settings to block users leaving the running website/app: 1. Settings > General > Multitasking Gestures must be deactivated Important information! 1. Settings > General > MULLIASKING GESTORES **must be Geactivated** 2. Settings > Notifications > Notification Center: **remove all listed apps** 

# instructions / infoport v1

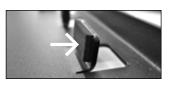

1. Prepare iPad: for example deactivate sleep function and ambient light sensor, install apps.

Recommendation for public use (to reduce risk of scratches, fingerprints, glare): Apply a matte, anti-fingerprint screen protector on iPad.

2. **Info** port: slide out drawer (to the left or to the right side).

3. For mobile use: At the info port feet, press in the 4 supplied rubber feet with a screwing-like movement.

For a fix installation: Screw on the outer frame of. Info port.

#### 4. Recommendation for a fix installation with power cable: \*

The iPad cable best exits the surface at the *flatter* foot of **info** port. The cable part exiting the surface must be 355mm long (without connector head), so that the drawer with iPad can be opened/closed later easily.

#### 5. Prepare drawer for iPad:

Tape protectors at the top of 8 iPad holders: thin for iPad 1, thick for iPad 2 and iPad 3. \*\* Place mat(s) into drawer: thin mat for iPad 1, both mats for iPad 2, thick mat for iPad 3. Place drawer with higher side on the back (will later be inserted at the higher **info** port foot). Place iPad into drawer, iPad home button on the right\* side.

# 6. Slide drawer carefully in outer frame:

Slide drawer into frame until the small slot on the bottom of the drawer is close to but not below - the outer frame. Insert iPad cable into the slot, and connect the cable to the iPad. Slide the rest of the drawer in, until it's centered below the outer frame.

# 7. Securing drawer and iPad:

Use a padlock with shackle thickness of 4mm to secure the iPad. For private use, also the supplied S-hook can be inserted to prevent opening of the drawer.

# 8. Handling

Access all functions from below. (1) power button (2) rotation lock/volume (configure in iPad settings!)

# 8. Opening the drawer:

Carefully slide out the tray, until the slot with the inserted iPad cable is visible. Disconnect cable from iPad and remove it from slot, then slide out drawer completely.

# Software tips

- xStand: iPad app with fullscreen mode, remote configuration of multiple iPads via Mac
- AVD Browse: iPadd app with fullscreen mode and other useful webkiosk functions
- MyKiosk: iPad app with full screen mode, adds navigation buttons to existing webpage
- \* Standard installation. There are other ways to install, depending the situation/needs.
- \*\* Option: use always same tape protectors for iPad and iPad 2/iPad 3, insted adjust by carefully bending holders with a monkey wrench.
