

Important information!
 If your iPad runs iOS 5, adjust 2 settings to block users leaving the running website/app:
 1. Settings > General > Multitasking Gestures **must be deactivated**
 2. Settings > Notifications > Notification Center: **remove all listed apps**

instructions / infoport v2

- 1. Prepare iPad:** for example deactivate sleep function and ambient light sensor, install apps.
 Recommendation for public use (to reduce risk of scratches, fingerprints, glare):
 Apply a mat, anti-fingerprint screen protector on iPad.

- 2. open info port:** with the key, release the 4 screws about 4mm (no need to remove them completely), take off the outer frame.

- 3. For mobile use:** At backside of **info port**, press in the 4 supplied rubber feet with a screwing-like movement.
For a fix installation: Screw on the inner part of **info port** (various holes available, also holes for VESA mounts).

- 4. Cable connection:**
 - Various openings at the bottom and on the sides (↑) for the cable connection.
 - 1 side with wide opening (1), so that the cable head can be inserted/removed without removing the outer frame.

- 5. Prepare inner frame for iPad:**
 Tape protectors *at the top* of the 8 iPad holders: *thin* ones for iPad, *thick* ones for iPad 2 + 3.
 Option: use always same tape protectors for iPad and iPad 2/iPad 3, insted adjust by carefully bending holders with a monkey wrench.
 Place mat(s) into inner frame: *thin* mat for iPad, *both* mats for iPad 2, *thick* mat for iPad 3.

- 6. Screw-on outer frame:**
 Place the outer frame over the inner frame, screw in the 4 screws.

- 7. Handling**
 Access all functions from below.
 (1) power button (2) rotation lock/volume (configure in iPad settings!)

- 8. Securing**
 Various slits on the bottom and the sides for Kensington locks (→).
 Use security screws (M5 x 12mm) at the outer frame for increased security.

Software tips

- xStand: iPad app with fullscreen mode, remote configuration of multiple iPads via Mac
- AVD Browse: iPad app with fullscreen mode and other useful webkiosk functions
- MyKiosk: iPad app with full screen mode, adds navigation buttons to existing webpage
